

With age, organ functionality progressively decreases due to cellular deterioration, primarily caused by oxidative stress, leading to a loss of vitality and quality of life.

This organ subfunctionality predisposes individuals to chronic degenerative diseases.

Damage from oxidative stress includes liver and degenerative diseases.

The contribution of cellular extracts, cytokines, and em-

bryonic growth factors has a renewing and revitalizing effect at the cellular level, increasing the specific functionality of the organ being treated.

Antioxidant enzymes neutralize free radicals, reducing oxidative stress damage.

Benefits

- Contributes to improved liver function
- Helps in improving digestion
- Contribute to equilibrium within the digestive system
- Aides with constipation, gastritis and malabsorption

Highlights

- Contains homeotherapeutic cellular extracts from liver, embryonic mesodermal tissue, thymus, and placenta.
- Includes antioxidant enzymes such as Superoxide Dismutase, Glutathione Peroxidase, Glutathione Reductase, and Glutathione Transferase.

Recommended Use

- **Hepatic Insufficiency and Cirrhosis, Hepatic Damage Secondary to Alcoholism, Hepatic Intoxication:** Two tablets in the morning and 2 at night, for at least six months.
- **Atherosclerosis, Type II Diabetes Mellitus, Hypercholesterolemia, Hypertriglyceridemia:** Two tablets in the morning and 2 at night, for at least three months.
