

With age, organ functionality progressively declines due to cellular deterioration, primarily caused by oxidative stress, resulting in a loss of vitality and quality of life.

This organic subfunctionality predisposes individuals to chronic degenerative diseases.

Damage from oxidative stress includes hepatic and degenerative diseases.

The provision of cellular extracts, cytokines, and embryonic growth factors exerts a renewing and revitalizing effect at the cellular level, increasing the specific functionality of the organ being treated.

Antioxidant enzymes neutralize free radicals, reducing oxidative stress damage.

Benefits

- Renewal and Revitalization of the Circulatory System
- Improvement of Specific Functionality of the Heart and Arteries
- The formula acts by revitalizing the circulatory system at a cellular level.
- Recommended for various conditions such as Arterial Hypertension, Heart Failure, Atherosclerosis, Renal Insufficiency, Varicose Veins, etc.

Highlights

- It contains homeotherapeutic cellular extracts from various organs. These extracts exert a renewing and revitalizing effect at a cellular level.
- It includes Biolastin, which may contribute to the antioxidant and anti-aging effects of the product.

Recommended Use

- **Hepatic Insufficiency and Cirrhosis, Hepatic Damage Secondary to Alcoholism, Hepatic Intoxication:** Take two tablets in the morning and two tablets at night, for at least six months.
- **Atherosclerosis, Type II Diabetes Mellitus, Hypercholesterolemia, Hypertriglyceridemia:** Take two tablets in the morning and two tablets at night, for at least three months.
