

The increasing ecological pollution makes inevitable the accumulation of heavy metals in the body, such as mercury, lead, cadmium, etc., depending on the level of exposure.

This accumulation can affect cognitive abilities, reasoning, and concentration, as well as reduce the efficiency of the immune system and predispose to degenerative and endocrine diseases.

Furthermore, this polluted environment significantly increases the production of free radicals in the body. The components of the formula have the ability to bind to

heavy metals and form water-soluble chelates, eliminable through urine.

The powerful antioxidants in the formula provide antioxidant protection, significantly neutralizing free radicals.

Benefits

- Removal of Heavy Metals
- Antioxidant Protection
- Improvement of Cognitive Abilities
- Boosts the Immune System
- Prevention of Degenerative and Endocrine Diseases

Highlights

- Cellular Extracts from Liver and Thymus Gland for specific functions.
- Lycopene, EDTA, R-Lipoic Acid, Vitamins D, C, and E for their antioxidant function.
- Contains EDTA and Clinoptilolite Zeolite to remove heavy metals.
- Beneficial Amino Acids such as Cysteine and Glycine for biological support.

Recommended Use

- **Preventive Action (High exposure to pollutants):** 1 tablet in the morning and 1 in the evening (1 X 1) for at least six months.
- **Adjunct Action (Heavy metal intoxication):** 2 tablets in the morning and 2 in the evening (2 X 2) for at least six months.
