

Human Ultracell®

Regenerative Therapy

The high content of NAD coenzymes, along with mitochondria proliferation inducers, contributes almost immediately to increasing cellular energy production, allowing cells to undergo autophagy, a cellular cleaning process to recycle accumulated useless biological material in their cytoplasm.

With the progressive recovery of energy production capacity and due to the effects of cytokines stimulating growth factors, a normalization process of cellular functions begins, particularly of their protein production machinery and DNA transcription controls, to prevent errors leading to dangerous mutations.

The normalization of protein production capacity leads to an increase in muscle mass, collagen in the skin, joints, connective tissue, etc.

In addition to improving cognitive functions, memory, etc., and stimulating the immune system.

Damage could affect the DNA of cells and lead to degenerative diseases and accelerated aging.

Benefits

- Cellular Renewal
- Mitochondrial Recovery
- Normalization of Cellular Functions
- Stimulation of the Immune System
- Increase in Muscle Mass
- Improvement of Cognitive Functions

Recommended Use

- **Preventive Action**
 - Ages 30 to 39: 30 doses and repeat every 6 months.
 - Ages 40 to 49: 30 doses and repeat every 4 months.
 - Ages 50 to 59: 30 doses and repeat every 3 months.
 - Ages 60 and over: 30 doses and repeat every 2 months.

Highlights

- It contains vitamins and minerals that are essential for various cellular functions.
- It includes Embryonic Homeotherapeutic Cellular Extracts that provide growth factors and cellular elements for regeneration.
- It contains enzymes essential in energy production and hormonal regulation.
- Formula Specific for Man or Woman

- **Adjuvant Action**

- Ages 30 to 39: 45 doses every 6 months.
- Ages 40 to 49: 45 doses every 4 months.
- Ages 50 to 59: 45 doses every 3 months.
- Ages 61 and over: 45 doses every 2 months.
